Product Revenue Performance

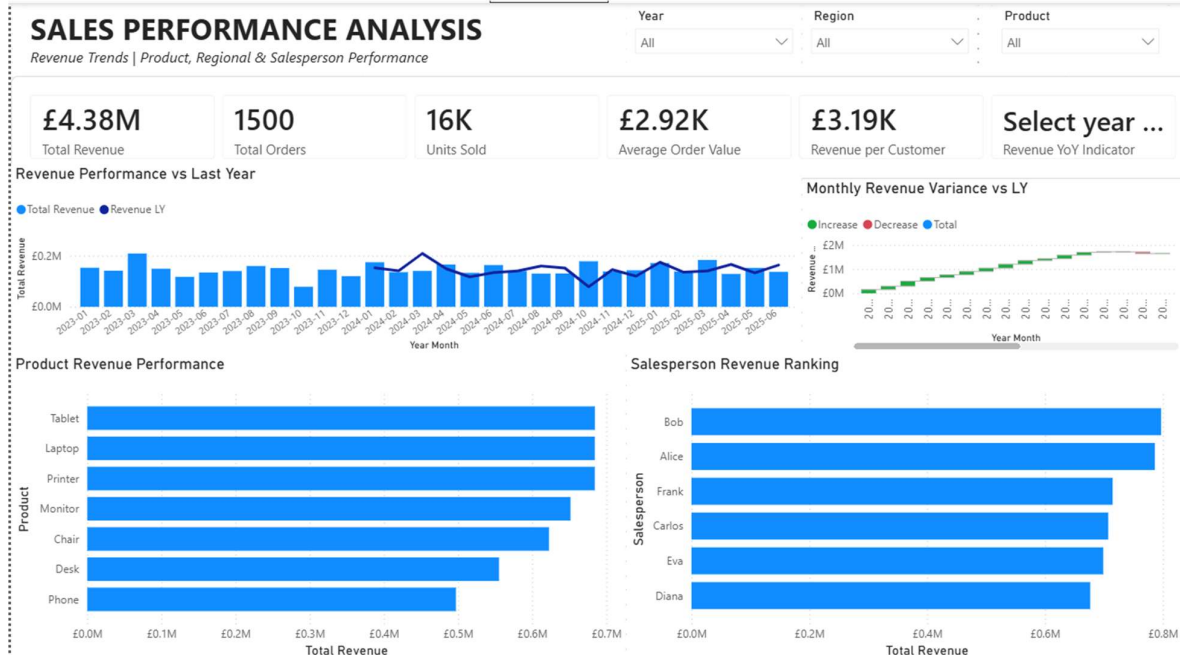

The project transforms 1,500 synthetic sales records into a clear reporting experience. Users can move from headline performance to product, regional and salesperson analysis.

Period: 2023-2025
Tools: Power BI, Power Query and DAX
Data: Excelx Product Sales by Region
Licence: CC0 synthetic practice data

PERFORMANCE DRIVERS

Understanding what sits behind revenue

The Sales Performance page compares revenue over time and shows how products and salespeople contribute to the overall result.

ANALYSIS

- **Responsive measures:** Revenue, orders, units sold and average order value respond to report filters.
- **Year-on-year:** DAX measures compare current and previous-year revenue.

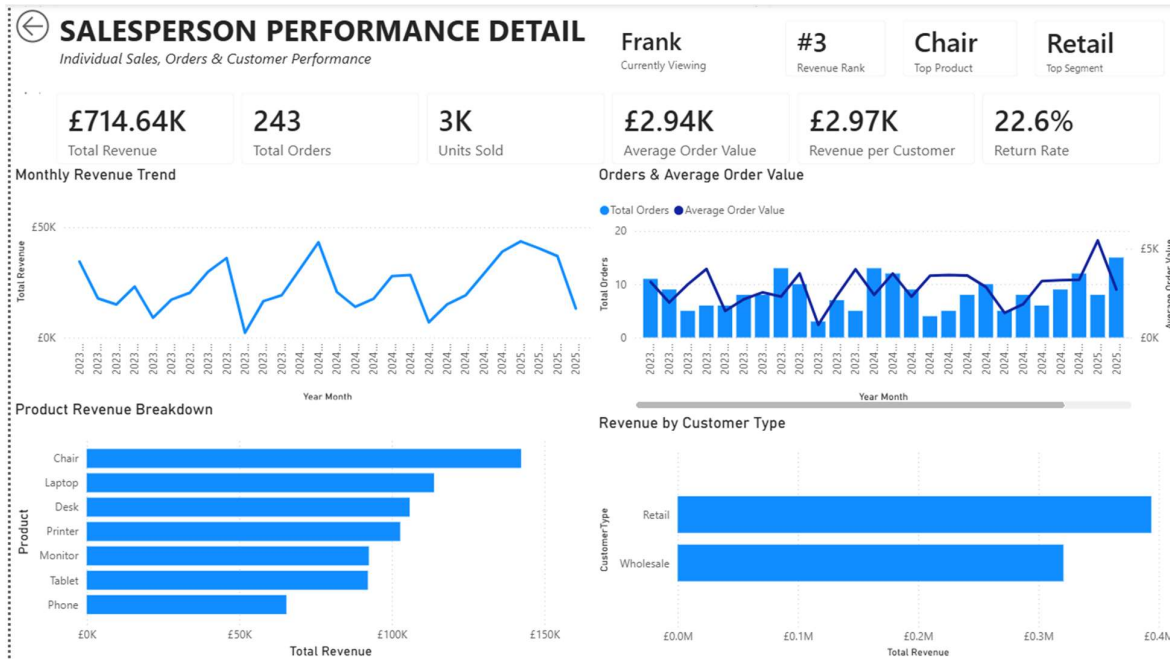

IMPLEMENTATION

- **Power Query:** Prepared and transformed the transactional data.
- **Data model:** Supports consistent filtering, dynamic rankings and drill-through.

INDIVIDUAL PERFORMANCE

From ranking to detailed investigation

Selecting a salesperson opens a focused view of their revenue, orders, product mix, customer type and return rate.

KEY FINDINGS

- **£4.38M revenue:** Generated from 1,500 orders, with average order value of approximately £2.92K.
- **Regional balance:** North led at about £0.97M; South was lowest at about £0.83M.

OUTCOME

The report creates a simple path from executive monitoring, to sales analysis, to individual investigation. Each page answers a different question without overloading the user.
